Description

Soy candles are made from a processed form of soy bean, soy wax typically has a lower melting point than traditional waxes. Meaning a cleaner burning, no toxins, carcinogens or pollutants which means it's less likely to trigger allergies. No petrol-carbon soot like you get from petroleum-based paraffincandles. Longer lasting soy wax burns cooler which means that you can enjoy your soy wax candle for generally 30-50% longer than a paraffin candle.

Available in 3 different fragrances.

**Pink Pepper:** A rich modern floriental fragrance opening with pink pepper, ginseng, freesia, ylang and gardenia, supported by a heart of rose, violet, orris and white orchid, resting on a base of vanilla, musk, sensual woods and sun ripened raspberries.

**Plum Blossom:** Capturing the delicate floral freshness of the beautiful pink plum blossom, this fragrance is gentle and sweet, yet tangy.

**Sweet Oriental :** A sweet, sensual floral fragrance with freesias, lilies and soft spring jasmine bouquettted by lush, mouth watering summer fruits including nectarine, plum, raspberry and ripe

fig, descending to a rich passionate base of powdery musk, creamy sandalwood and crystal amber, warmed by a hint of vanilla.
